Specification

[Summarized translation]

This utility model is relating to one kind of massage and grinding-bristle toothbrush.

There is one kind of massage toothbrush in the current market, the character of which is that the back of the toothbrush head is uneven. It can take massage for the muscles of the face when brushing the teeth.

There is one kind of grinding-bristle toothbrush in the current market, the bristle of which is grinded. It will be more comfortable when brushing the teeth.

The purpose of this utility model is to combine the two advantages into one toothbrush, which can be reached by the way as follows:

The toothbrush includes the toothbrush head and handle. The bristle in the front of the toothbrush head is grinded. The back of the toothbrush head is uneven, where many convex parts were set. It combines the advantages of two toothbrushes. When brushing your teeth, you will not only feel comfortable, but also it can take massage for your muscles of your mouth.
